

2019 FACA Educational Foundation Scholarship Award Report

Thank you for assisting me financially to attend the 2019 NACAA AM/PIC. As a result of this trip I have improved my knowledge in many areas of Agriculture, Agricultural Education, computer software, and time management. I was honored to present a poster of work my team is involved with using unmanned aerial vehicles equipped with multi spectrum camera to address water and fertilizer savings. Tim Wilson and I also extended our trip to visit agricultural enterprises in Michigan and Ohio.
